## Hakkımızda

**ÇUKUROVA**<sup>®</sup>  
polistren dekor

Çukurova Polistren, Hazır Kartonpiyer, EPS Tavan Plakası, Lamba Göbekleri, Desenli Kartonpiyer, Dış Cephe Söve, Denizlik, Fuga, Sütun, Kaide, Payanda vb. dekorasyon ürünlerinin yanı sıra; Mantolama Board, Asmolen ürünleri ile de izolasyon grubuna hitap etmektedir.

Değişen dünya düzeni ve ekonomik değişiklikleri çok iyi okuyarak, satış ve yatırım stratejileri belirlidik. Bunları özenle uyguladık. İhracatta bölgemizde ve sektörümüzde sayılı firmalardan biri olarak ve buna bağlı artan istihdamımızla ülke ekonomisine fayda sağladık, sağlıyoruz, sağlayacağız. Hem sermayemizi hem de piyasada ki yerimizi koruduk. Bu istikrarlı yönetim anlayışımız bize 'güven' ve 'büyüme' olarak geri döndü. Yılı kayıpsız bitirmenin ve hedeflerimize ulaşmanın haklı gururu içerisindeyiz.

## İHRACAT

Firmamız ihracat hedeflerine bir bir ulaşmaktadır. Ortadoğu pazarında birçok ülkede markamız yayılmaktadır. Dünyanın en prestijli fuarlarına katılarak Afrika ve Asya'da ki pazarımızı genişletmeye çalışıyoruz.

## KALİTE POLİTİKASI

Sağladığımız ürün ve hizmetlerde; müşteri memnuniyetini en üst düzeyde tutmak, müşteri geri bildirimlerini etkin bir şekilde yönetmek, değer yaratmayan işlemleri ortadan kaldırarak kaynakların etkin kullanımı ile zamanında teslimat yapmak ve sürekli iyileştirmeyi amaçlayan bir kalite yönetim sistemi oluşturmaktır. Bu doğrultuda ISO9001, ISO14001 ve ISO18001 belgelerini alıyoruz.

Çukurova Polistren müşterilerinin işlevsel gereksinimlerini en ekonomik ve teknik olanaklarla bağdaştırarak estetik ve modern projeler meydana getirir. Ürettiği projelerinde müşterilerinin hayallerini temek alarak güncel gelişmeleri çalışmalarına adapte ederek konforlu yaşam alanları tasarlar ve uygular ve projelerinde konfor, sağlamlık ve güzelliği ön planda tutmaktadır.

## İŞ GÜCÜ

Çukurova Polistren'de herkes kendi işinin lideridir; esnek organizasyon yapımız her çalışanın kendi işiyle ilgili konularda sorumluluk almasına ve inisiyatif kullanmasına olanak tanır.

Çukurova Polistren toplamda 60 üretim çalışanı ve 15 idari personel ile hizmet vermektedir.

## FİYAT POLİTİKASI

Bölgemizde faaliyet gösteren inşaat Firmaları ve müteahhitlerin en çok tercih ettiği çalışma ve iş ortaklarından olan Çukurova Polistren; sağladığı kaliteli ürün ve hizmet anlayışının yanısıra uygulamış olduğu uygun fiyat politikasıyla da ayrıca bireysel tüketicilere de özel imkankar sunmaktadır. Toptan fiyatına perakende fiyattan satış yapan Çukurova Polistren böylece ev yaptıran ve yapmayı düşünenlerin bütçelerine ayrıca bir katkı sağlamaktadır.

## EPS'NİN TANIMI

Expanded Polisten Sert Köpük (EPS-Genleştirilmiş Polisten Sert Köpük), petrolden elde edilen, köpük halindeki, termoplastik, kapalı gözenekli, tipik olarak beyaz renkli bir ısı yalıtım malzemesidir.

Polisten taneciklerinin şişirilmesi ve birbirine kaynaşması ile elde edilen EPS (Genleştirilmiş Polisten Sert Köpük) ürünlerde, taneciklerin şişirilmesi ve köpük elde edilmesi için kullanılan şişirici gaz Pentan'dır. Pentan, tanecikler içinde çok sayıda küçük gözeneklerin oluşmasını sağladıktan sonra, üretim sırasında ve üretimi takiben çok kısa sürede hava ile yer değiştirir. Böylece EPS levhaların bünyesinde bulunan çok sayıdaki (1 m3 EPS' de milyar) küçücük kapalı gözenekli hücreler içinde durgun hava hapsolür. Malzemenin %98'i hareketsiz ve kuru havadır.

Üretimimin enerji yoğun olmaması, üstün teknik özelliklerine rağmen ekonomik olmasının diğer önemli sebebidir. Etkin mekanik dayanımının yanında şişirici gazın çok kısa sürede hava ile yer değiştirmesi, ürünün performansının kullanım ömrü boyunca sabit kalmasını sağlar. Kalınlığı incelmez, ısı iletkenliği artmaz, özelliklerinde hiçbir bozulma meydana gelmez.

EPS üretiminde son aşama olan şekil verme (kalıplama) aşamasında, taneciklerin birbirleri ile sıkıca kaynaşması sağlanır. Bu uygulamanın başarısı, ürünün yüzeyindeki taneciklerin bal peteği şeklindeki görüntüsünden anlaşılr.

**KULLANIM YERLERİ** Yapıların yan duvar, teras çatı, zemin ve bodrumlarının sıcağa-soğuğa karşı yalıtımlarında, hafif prefabrik yapı elemanlarında, soğutma tesislerinde ticari depolarda, dilatasyon ve yağmur derelerinde, cam ve kırılabilir ürün taşımacılığında ambalajlamada balıkçılık sektöründe kalıp olarak kullanımı reklamcılık ve dekorasyon sektöründe ekspanda polisten köpük yaygın olarak kullanılmaktadır.

**DESCRIPTION OF EPS** Expanded Polystyrene Hard Foam is a kind of insulation material from petrol that is in the form of foam, thermoplastic, that has closed pore and typically white color.

In the EPS (Expanded Polystyrene Hard Foam) product which is obtained with blowing up polystyrene portides and then combination of these them, the gas used to blow up particles and obtain foam is "pentane": After providing formation of many small pores within particles, pentane replaces with air in a short period of time during the time of production and following the production. Thus, EPS is confined to stagnan air within the numbers (3.6 billion in 1 m3 EPS) of very small closed porous cells in EPS plates. 98% of the material is still and dry air.

It is one of the other important reasons to be economic, despite its high technical specification, because production is not energy intensive. Replacement of blowing gas with air in a very short period of time as well as active mechanical resistance provides the performance of product to be stable during the use life. Its thickness does not becomes thin. its hat conductivity does not increase and no deformation occurs in its specifications.

In the stage of shaping (moulding) that's the last stage in EPS production, tightly combination of portides is provided. Achievement of that application is seen trough the honeycomb appearance of particles on the product surface.

**PLACES OF USE** Expanded polystyrene foam is commonly used for the insulation of constructions' side walls, terrace penthouses, ground floor and cellars against heat-cold, in the light prefabricated constructional elements, cooling facilities, commercial warehouses, dilatation and rain streams, transportation of glass and breakable product, packing, in the fishing sector as mould and advertising and decoration sector.

### تعريف البوليسترين

رغوة البوليسترين ين القاسية المتمددة الذي نحصل عليه من البترول بشكل رغوة و تكون لدنة و ذو لون ابيض التي تشكل بدورها احد مواد العزل الحراري.

ان انتفاخ حبات البوليسترين و تمازجها و اندماج الحبات مع بعضها ينتج لدينا منتج البوليسترين و لا تمام تمازج و اندماج و انتفاخ حبات البوليسترين مع بعضها البعض يتم استعمال غاز البنتان. بعد حدوث ثقب صغير في الحبات بفعل البنتان و اثناء تعقيب الانتاج في زمن قصير جدا تقوم بتغيير مكانها مع الهواء. وهكذا يتواجد في 1 م 3 من لوحة البوليسترين حوالي مليار ثقب مغلق صغير. ويتم حبس الهواء داخلها و 98% من المواد تكون هواء جاف و ثابتة, وبسبب عدم كثافة طاقة الانتاج و وجود الخصائص التقنية تكون ذو تكلفة اقتصادية التي بدورها تسبب اهمية المنتج. الى جانب فعالية ثباتها فان الغاز المسبب للانتفاخ تغير مكانها مع الهواء وفعالية استعمال المنتج تكون ثابتة مدى الحياة و لا يتم قلة سماكتها و لا تقوم ايضا بزيادة النقل الحراري و لا تتسبب بتخريب اي خاصية من خصائصها. اثناء انتاج اللوح البوليسترين في مرحلته الاخيرة يتم اعطاء الشكل النهائي للقبال و تتضمن بذلك تمازج الحبات و تماسكها و نجاح هذه العملية يتضح من شكل توضع الحبات الذي يكون على شكل خلايا النحل.

### اماكن استخدامها:

الجدان الجانبية للمباني, تراس سطوح المباني, المداخل والمستودعات, عوازل للحرارة والبرودة, في المباني مسبقة الصنع الخفيفة منشآت التبريد, المستودعات التجارية, المجاري المائية, الزجاج, امبلاج المواد القابلة للكسر, قطاع الاسماك يتم استخدامه كقوالب, و لأغراض الدعاية و الاعلان والديكور خاصة تكون منتشرة بشكل كبير.

## Dış Cephe Ürünler

### Exterior Product

### المنتجات الخارجية

*Yüksek dansite EPS ürünlerin şekillendirilmesiyle elde edilen polistrene, birden çok kimyasal maddenin karıştırılmasıyla oluşan akrilik esaslı reçinenin kaplanmasıyla elde edilir.*

*All the products are obtained with shaping high density EPS with covering of acrylic compounds.*

كل المنتجات مصنعة من البوليسترين هي ذو كثافة عالية مع خليط من مواد كيميائية متعددة كالأكرليك

Long Lasting

Best Quality

Easy Montage

# CUKUROVA®

polistren dekor

- Dört metrelik kolaylık
- Esnek yapı
- Kolay uygulama
- Alev yürütmez

- أربع أمتار
- هيكل مرن
- تركيب سهل
- غير قابل لإنتشار اللهب

# 4 CEPHEDE DÖRTLÜK MALZEME

ألواح واجهات خارجية بطول 4 متر

4 metre

- Teknolojimizi, tüm dış cephe ürünlerimizde  
4 metreye kadar üretebilecek hale getirdik.

- Bu sayede ek olmadan uygulama gerçekleştirilebilecektir.

- Ürünler esnek hammadeden üretileceği için  
herhangi bir kırılma söz konusu olmayacaktır.

- لقد جعلنا تقنيتنا قادرة على إنتاج ما يصل إلى 4 أمتار في جميع منتجاتنا الخارجية

بهذه الطريقة ، سيكون من الممكن تنفيذ الطلب بدون إرفاق

- بما أن المنتجات سيتم إنتاجها من مواد خام مرنة فلن يكون هناك تكسر

- يمكنك زيارة موقعنا على الإنترنت لمشاهدة مشاريعنا النهائية وتصاميمنا الفريدة
